**RAFFLES** is one of the largest schools in Asia and Europe, specializing in Design and Business programs. Raffles offers 3-year Bachelor's and 1-year Master's programs.

Some benefits of studying at Raffles include access to a globally recognized curriculum, small class sizes which allows for more interaction between students and teachers, exposure to diverse cultures through its international branches, and opportunities to participate in design and business competitions. Raffles also provides students with practical learning experiences through internships, projects, and industry exposure. Graduates of Raffles have a high employability rate in the design and business industries.

**GLOBAL REACH:** Raffles has a global presence with 18 branches in 10 countries, including Italy, Singapore, Thailand, Malaysia, China... This allows students to gain a diverse education by transferring between schools, experiencing different cultures and study environments, and interacting with classmates from around the world. These opportunities provide students with a broad perspective on various fields and help them establish relationships, build future connections, and prepare for a career in the globalized job market.

**QUALITY CURRICULUMS:** Raffles places a strong emphasis on the quality of its curriculums, which are constantly updated to ensure that students are learning the most current and relevant information. The school encourages students to participate in both local and international design competitions, where they have a track record of winning awards in almost every competition they enter.

**EXPERIENCED PRACTITIONERS:** The school has a professional and experienced faculty team from various countries worldwide, such as Europe, America, Australia, Canada, etc., bringing diversity in knowledge and experience to the students. All the teachers are active in the design, art and creativity industry. They provide students with not just theoretical knowledge but also practical working experience. The classroom assignments mirror real-life projects from design and media companies, preparing the students for the work environment. This means that upon graduation, students are equipped and ready to join the workforce with minimal adjustment time required to adapt to the working pace.

**INDUSTRIAL COLLABORATIONS:** Throughout their three-year studies at Raffles, students are given the chance to partner with the school's industrial affiliates and tackle real-world projects, through various events like industrial projects or competitions. These hands-on experiences will be added to their portfolio, and upon graduation, alongside their final thesis, they can confidently showcase to employers their practical experience and skill set developed during their time at Raffles.

**EMPHASIS ON PERSONAL GROWTH:** With classes limited to 15-20 students at most, there is a closer relationship between instructors and students. This smaller setting enables teachers to assess each student's strengths and areas for improvement, thereby fostering their development and addressing any shortcomings.

The school has a **CENTER FOR PROFESSIONAL DEVELOPMENT** that focuses on various aspects to enhance students' career prospects. Some of its offerings include:

- Securing internship opportunities with local and foreign companies,
- Providing workshops on resume writing and interview skills,
- Organizing and searching for design competitions for students to participate in and showcase their work,
- Hosting career fairs for industrial partners to interview students, and
- Establishing collaborations for students to work on real-life projects.

All of these initiatives aim to increase the employability of Raffles graduates upon graduation.
